

## List of storage codes

In order to make it easier to identify archival material, the Israel State Archives has decided to provide storage codes in English.

The storage code identifies the type of material or its origin. It should be added before the box number when ordering or quoting documents.

A list of codes is given below.

The correct form of reference for material from the Archives is as follows:

ISA/record group no./storage code /box no. /file no.

For example: ISA/RG 130/MFA/2543/2

Please contact the reading room for assistance if necessary.

Type of material	Storage code	קוד אחסון עברי
Previously classified material	A	א
Levi Eshkol archives	ESH	איא
Press collection	PC	אע
Law courts	LAW	ב
Government ministries	G, GL	ג, גל
